SunCedar Energy

Clean power that never sleeps.

Business Profile · Beirut, Lebanon · Founded 2021

1. Company Overview

SunCedar Energy is a Lebanese solar-energy company that designs, installs and maintains solar and battery systems for homes and small businesses. It was founded in 2021 in Beirut by Rania Haddad and Karim Aoun, after years of daily power cuts convinced them that families should not have to depend on noisy, polluting diesel generators. Since then the company has installed more than 1,200 systems, employs 38 people, and holds an average customer rating of 4.8 out of 5 from more than 900 reviews.

2. Mission and Vision

Mission: to give every home and small business in Lebanon clean, reliable, around-the-clock electricity, and freedom from diesel generators.

Vision: a quieter, cleaner Lebanon powered by the sun by 2035.

3. Services and Pricing

All prices are in US dollars, include equipment, mounting structure, installation, SunPulse app setup and the first year of the CareShield maintenance plan. Roof works beyond standard mounting (for example elevated pergola structures) are quoted separately after the audit.

3.1 Free Energy Audit

A 60-minute on-site visit by a SunCedar engineer: load assessment, roof and shading survey, and a tailored written proposal delivered within 48 hours. The audit is free and without obligation anywhere in our service area.

3.2 Home Solar Packages

Package	System	Best for	Price
Essential	3 kWp solar panels, 5 kWh LiFePO4 battery, 5 kW hybrid inverter	Apartments: lights, fridge, internet, TV and laptops	$3,900
Comfort	5 kWp solar panels, 10 kWh LiFePO4 battery, 8 kW hybrid inverter	Families: adds washing machine, water pump and one AC unit during the day	$6,500
Premium	8 kWp solar panels, 15 kWh LiFePO4 battery, 10 kW hybrid inverter	Villas and large homes: whole house including 2-3 AC units during the day	$9,800

Every package is designed to be expandable: panels and batteries can be added later.

3.3 Business Solar

Custom systems from 10 kWp to 100 kWp for shops, clinics, restaurants, schools and small factories. Pricing is by custom quote after the free energy audit. Typical payback compared with diesel generation is 2 to 4 years.

3.4 Battery Retrofit

Adds LiFePO4 battery storage to an existing solar system, subject to a compatibility check of the existing inverter. Starts from $1,800 for 5 kWh of storage.

3.5 CareShield Maintenance Plan

$15 per month or $150 per year (the first year is included with every package). Includes two professional panel cleanings per year, an annual system health check, 24/7 remote monitoring, priority repairs within 48

hours, and a 10% discount on replacement parts.

3.6 SunPulse Monitoring App

Free with every installation, for iOS and Android. Shows live solar production and battery level, sends outage and fault alerts, and produces a monthly savings report.

3.7 What We Do Not Offer

We do not currently install solar water heaters or electric-vehicle chargers, and we do not sell equipment without installation.

4. Payment and Financing

- Payment schedule: 30% deposit at contract signing, 60% when equipment is delivered, and 10% after commissioning.
- Accepted methods: bank transfer, cash (USD) and credit/debit card.
- Financing: 12-month interest-free installments on the Essential and Comfort packages through our partner, Cedar Community Bank, subject to the bank's approval.

5. Warranties

- Solar panels: 25-year performance warranty (at least 80% of rated output).
- Inverters: 10 years.
- Batteries: 10 years or 6,000 cycles, whichever comes first.
- Workmanship (installation): 5 years.

6. Installation Process and Timeline

- Step 1 - Book a free energy audit (phone, WhatsApp, email or this assistant).
- Step 2 - On-site audit; written proposal within 48 hours.
- Step 3 - Sign the contract and pay the 30% deposit.
- Step 4 - Installation: 1-2 days for a residential system.
- Step 5 - Commissioning, SunPulse app setup and a hand-over walkthrough.

From audit to switch-on typically takes 7 to 14 days for a home system.

7. Service Area, Hours and Contact

- Service area: Greater Beirut, Mount Lebanon, Byblos (Jbeil) and Batroun. Projects outside these areas are considered case by case.
- Showroom: 2nd floor, 14 Makdessi Street, Hamra, Beirut.
- Opening hours: Monday-Friday 8:00-18:00, Saturday 9:00-14:00, closed Sunday.
- 24/7 emergency support line for CareShield members.
- Email: hello@suncedar-energy.example · Phone and WhatsApp: +961 1 555 0123.

8. Our Team

Rania Haddad - Co-founder and CEO. Electrical engineer with 12 years of experience in power-grid planning. Leads company strategy and partnerships.

Karim Aoun - Co-founder and CTO. Power-electronics engineer who designed the SunPulse monitoring platform and leads system design.

Maya Saliba - Head of Customer Success. Runs the customer support team and the CareShield maintenance program.

Elie Nassar - Lead Installation Engineer. Supervises our six installation crews and is certified in high-voltage battery safety.

9. Our Unique Value Proposition

Outage-proof in two weeks, with one accountable team.

- One team from audit to after-sales: no subcontractors, no finger-pointing.
- Transparent, fixed package pricing published up front.
- LiFePO4-only batteries: safer and longer-lasting than lead-acid.
- SunPulse live monitoring with outage alerts and monthly savings reports.
- A 48-hour repair promise for CareShield members.

10. Frequently Asked Questions

Does the system keep working during a power cut? Yes. The hybrid inverter switches to solar and battery power automatically in under 10 milliseconds, so most devices do not notice.

Can I expand my system later? Yes. All packages are designed so panels and batteries can be added later.

I live in an apartment building. Can I still install solar? Yes, with roof-access permission from the building committee. We help prepare the documentation.

SunCedar Energy is a fictional company created for the EECE 503P/798S Agentic Systems course assignment. All names, numbers and contact details are invented.
